Microsoft Excel spreadsheets are the most widely used in the world. Many people panic in the face of all the formulas a Microsoft (MS) Excel spreadsheet requires and this is where Excel courses come in, especially with us called as **DATA MANAGEMENT AND ANALYSIS USING ADVANCED EXCEL**. These courses are available for all types of users, from absolute beginners to advanced power users. Excel has many applications in the real world, which is why the beginners and advanced Excel courses are so popular.

### **DATA MANAGEMENT AND ANALYSIS USING ADVANCED EXCEL**

is all about Financial Modeling with MS Excel Foundation & Advanced training enables professionals to handle finance models by applying advanced level tools and applications of Excel. In Advanced Excel Financial Modeling is the task of building a model representing financial asset and performance of a business. Financial Modeling skills are must for finance and commerce professionals especially for almost all mid-senior management professionals worldwide. The added skills gained through MS Excel training helps finance and commerce professionals to gain an in-depth understanding of financial modeling techniques to succeed in today's demanding environment.

#### **Why is the certification most in demand?**

Given the complex nature of today's real time scenarios, there has been a shift towards using spreadsheets to facilitate detailed, comprehensive excel tools. In addition, spreadsheet software also allows powerful data presentation using numerous visual elements through back-end code. Microsoft Excel is the most feature-rich software for spreadsheet based modeling, and also most commonly used.

### Data Science Syllabus

Want to know about the syllabus of Data Science? The Data Science course syllabus comprises three main components, i.e. Big Data, Machine Learning and Modeling in Data Science. Across these three main components, the subjects are cover varied areas of this sought-after discipline. Here is the complete Data Science Syllabus:

Unit-1	Introduction to Data Science,  Mathematical & Statistical Skills, Machine Learning, Coding, Algorithms used in Machine Learning	12hr
Unit-2	Statistical Foundations for Data Science, Data Structures & Algorithms, Scientific Computing, Optimization Techniques, Data Visualization, Matrix Computations, Scholastic Models	10hrs
Unit-3	Experimentation, Evaluation and Project Deployment Tools, Predictive Analytics and Segmentation using Clustering, Applied Mathematics and Informatics,  Exploratory Data Analysis,  Business Acumen & Artificial Intelligence	12hrs
