### **Overview of Training programme**

The training program was conducted in two different Archaeological sites. First session was at Salapura Archaeological site, second session was held at Halebidu Archaeological site.

#### **Session 1: Salapura**

The first session of the training held at Salapura an Archaeological site, while going to the excavation site at Halebidu. Dr. Mohana a Rock art Specialist opened the training programme at Rock Shelter by providing information of Rock art depiction. He explained, the importance of rock art, rock art is the most important visual record of humanities ancient past, which if irretrievably damaged, is lost forever. Next, Shrivatsa, Environment Archaeologist, explained the ecology of the Site and provided how the rock art human were living, how the nature was supporting their life in the site, then, he explained how the Rock art studies will be done in scientifically and culturally. Praveen Kumar K, a Research Scholar and Coordinator of the training programme walked through

the site and he explained that how to identified the Archaeological site through the exploration and He explained the importance of Cultural material at the site. Sanjana Rangan, a museum professional, introduced the concept of museums and the need to preserve culture and heritage through such institutions. She explained that museum visits and visits to nice need to go beyond just a simple visit, but students should start asking questions about the reasons behind what they see. Culture and all its manifestations must be understood and preserved.

## **Session 2- Halebid**

The second session of the training was our main programme which was held at Halebid, archaeological site in Hasan District. Dr. Kumaran and Dr Saranya Kumaran, Assistant Archaeologists, ASI Bengaluru Circle, provided details of Excavation methods, identify, process, and Documentation process in Archaeological excavation. Then, they also explained how to excavate the archaeological site and preserve the site. Next, Shivakantha Bajpai, Director of the Excavation, interacted with the students regarding career opportunities in Archaeology. Students raised many questions and discussed with the Director of the Excavation. He also explained that how to excavate the historical monument in systematic manner, how to understand the cultures from the excavation, and how to build career in Archaeology by interacting with the Students During the day students had the opportunity to visit the Hoysaleswara temple and they learnt about the History of the temple and art and architecture.

## **Out Comes**
